Safety Data Sheet

according to 29 CFR 1910.1200(g)

Essentium TPU 80A - Z

Revision date: 11/24/2021  Product code: Page 1 of 11

1. Identification

Product identifier
Essentium TPU 80A - Z

Recommended use of the chemical and restrictions on use

Use of the substance/mixture
Industrial uses

Uses advised against
Any non-intended use.

Details of the supplier of the safety data sheet
Company name: Essentium Inc.
Street: 19025 N. Heatherwilde Boulevard, Suite 100
Place: TX 78660 Pflugerville
Telephone: +1 512-643-0548
Responsible Department: Info@Essentium.com
Emergency phone number: +1 512-643-0548 (Mo- Fr, 8:00 - 16:00 CST)

2. Hazard(s) identification

Classification of the chemical
29 CFR Part 1910.1200
This mixture is not classified as hazardous in accordance with Regulation 29 CFR 1910.1200(d).

Label elements

Additional advice on labelling
Label elements GHS: None

Hazards not otherwise classified
The product contains nano particles. To what extent nano-particles can cause a damage of the human organism, is not yet sufficiently clarified.

3. Composition/information on ingredients

Mixtures

Chemical characterization
polymer: Polyurethane and Additive and Stabilisers.

The components listed in Chapter 3 are listed voluntarily for information purposes.

Hazardous components

<table>
<thead>

4. First-aid measures

Description of first aid measures

General information
In case of accident or unwellness, seek medical advice immediately (show directions for use or safety data sheet if possible).

After inhalation
In case of accident by inhalation: remove casualty to fresh air and keep at rest. In case of respiratory tract
irritation, consult a physician.

After contact with skin
Gently wash with plenty of soap and water. In case of skin irritation, seek medical treatment.

After contact with eyes
Rinse cautiously with water for several minutes. In case of troubles or persistent symptoms, consult an ophthalmologist.

After ingestion
Rinse mouth thoroughly with water. Let water be drunken in little sips (dilution effect). Do NOT induce vomiting. In all cases of doubt, or when symptoms persist, seek medical advice.

Most important symptoms and effects, both acute and delayed
No information available.

Indication of any immediate medical attention and special treatment needed
Treat symptomatically.

5. Fire-fighting measures

Extinguishing media
Suitable extinguishing media
Carbon dioxide (CO2) Dry extinguishing powder. alcohol resistant foam. Atomized water.

Unsuitable extinguishing media
High power water jet.

Specific hazards arising from the chemical
Can be released in case of fire: Carbon monoxide Carbon dioxide (CO2). Nitrogen oxides (NOx).

Special protective equipment and precautions for fire-fighters
In case of fire: Wear self-contained breathing apparatus.

Additional information
Collect contaminated fire extinguishing water separately. Do not allow entering drains or surface water. Co-ordinate fire-fighting measures to the fire surroundings.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures
General advice
Avoid dust formation.
Do not breathe dust.

For non-emergency personnel
Wear personal protection equipment (refer to section 8).

For emergency responders
No special measures are necessary.

Environmental precautions
Discharge into the environment must be avoided.

Methods and material for containment and cleaning up
For containment
Take up mechanically.
Treat the recovered material as prescribed in the section on waste disposal.

For cleaning up
Clean contaminated objects and areas thoroughly observing environmental regulations. Elimination of dust deposits containing nanoparticles in the wet/wet process and only as a second priority with a suitable vacuum cleaner (never blow off with compressed air).
Reference to other sections
Safe handling: see section 7
Personal protection equipment: see section 8
Disposal: see section 13

7. Handling and storage

Precautions for safe handling

Advice on safe handling
Wear suitable protective clothing. (See section 8.)

Advice on protection against fire and explosion
Usual measures for fire prevention. Dust clouds may present an explosion hazard.

Advice on general occupational hygiene
Always close containers tightly after the removal of product. Do not eat, drink, smoke or sneeze at the workplace. Wash hands before breaks and after work.

Further information on handling
Avoid generation of dust.
During dusty work with the product, nanomaterials can be released.
General protection and hygiene measures: refer to chapter 8

Conditions for safe storage, including any incompatibilities

Requirements for storage rooms and vessels
Keep container tightly closed in a cool, well-ventilated place.
Suitable material for Container: Polyethylene (HDPE, LDPE).

Hints on joint storage

Further information on storage conditions
Keep the packing dry and well sealed to prevent contamination and absorbtion of humidity.
Recommended storage temperature: 20°C
Protect against: frost. UV-radiation/sunlight. heat. Humidity

8. Exposure controls/personal protection

Control parameters

Exposure limits

<td>PEL</td>
</tr>
</tbody>
</table>

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

Additional advice on limit values

Exposure controls

Appropriate engineering controls
Technical measures and the application of suitable work processes have priority over personal protection equipment.
Dust should be exhausted directly at the point of origin.

Individual protection measures, such as personal protective equipment
Safety Data Sheet

according to 29 CFR 1910.1200(g)

Essentium TPU 80A - Z

Revision date: 11/24/2021 Product code: Page 4 of 11

Eye/face protection
   Dust protection goggles.

Hand protection
   In case of prolonged or frequently repeated skin contact:
   Wear suitable gloves.
   Suitable material:
   - FKM (fluororubber). - Thickness of the glove material 0,4 mm
     Breakthrough time >= 8 h
   - Butyl rubber. - Thickness of the glove material 0,5 mm
     Breakthrough time >= 8 h
   - CR (polychloroprenes, Chloroprene rubber). - Thickness of the glove material 0,5 mm
     Breakthrough time >= 8 h
   - NBR (Nitrile rubber). - Thickness of the glove material 0,35 mm
     Breakthrough time >= 8 h
   - PVC (Polyvinyl chloride). - Thickness of the glove material 0,5 mm
     Breakthrough time >= 8 h
   The selected protective gloves should satisfy the specifications of standards like EN 374.
   Before using check leak tightness / impermeability. In the case of wanting to use the gloves again, clean them
   before taking off and air them well.

Skin protection
   Suitable protective clothing: Lab apron.

Respiratory protection
   With correct and proper use, and under normal conditions, breathing protection is not required.
   Respiratory protection necessary at:
   - Exceeding exposure limit values
   - Insufficient ventilation and Generation/formation of dust
   Suitable respiratory protective equipment: Particulate Respirators, Standard: 42 CFR Part 84 or DIN 143. Type:
     R/N/P-95/99/100
     The filter class must be suitable for the maximum contaminant concentration (gas/vapour/aerosol/particulates)
     that may arise when handling the product. If the concentration is exceeded, self-contained breathing apparatus
     must be used.

Thermal hazards
   Material handled at elevated temperature may cause thermal burns by contact with molten product.

Environmental exposure controls
   No special precautionary measures are necessary.

9. Physical and chemical properties

Information on basic physical and chemical properties

<table>
<thead>

Changes in the physical state

| Melting point/freezing point: | not determined |
| Boiling point or initial boiling point and boiling range: | not determined |
| Sublimation point: | not determined |
| Softening point: | >120 °C |
| Pour point: | not determined |
| Flash point: | not determined |
Explosive properties
Dust clouds may present an explosion hazard.

Lower explosion limits: not determined
Upper explosion limits: not determined
Auto-ignition temperature: >400 °C

Self-ignition temperature
Gas: not determined
Decomposition temperature: >230 °C

Oxidizing properties
none

pH-Value: not determined
Viscosity / dynamic: not determined
Viscosity / kinematic: not determined
Flow time: not determined
Water solubility: Immiscible

Solubility in other solvents
not determined

Partition coefficient n-octanol/water: SECTION 12: Ecological information
Vapor pressure: not determined
Density (at 20 °C): 1.1 - 1.2 g/cm³
Bulk density (at 20 °C): 500 - 700 kg/m³
Relative vapour density: not determined

Other information
Information with regard to physical hazard classes
Sustaining combustion: Not sustaining combustion

Other safety characteristics
Solvent separation test: not determined
Solvent content: not determined
Solid content: not determined
Evaporation rate: not determined

Further Information
Multi-Walled Carbon Nanotubes (MWCNT), synthetic graphite in tubular shape:
particle characteristics:
Electron microscopy images show that Multi-Walled Carbon Nanotubes(MWCNT) consist of tightly bound agglomerates consisting of tangled tubes. In dispersions, the median diameters of these agglomerates are in the range of 533 - 569 µm with a D90 in the range of 679 - 945 µm.

The size of the agglomerates is not significantly reduced when MWCNT is aerosolised in the dry state and analysed with a Malvern particle size analyzer at pressures of 1 and 4 bar. Depending on pressure, the mean particle diameters are in the range of 85 to 427 µm (D90: 228-1172 µm) and the inhalable fraction (under 10 µm) is very small (0 % at 1 bar and 0.19 % at 4 bar)

The tubes within the MWCNT agglomerates can be described as short, thin and tangled. Specifically, they display an outer tube diameter distribution of at least 90 % under 30 nm (D90 <= 30 nm). Single results were D90 = 18 nm, 24 nm and 12.7 nm. The mean outer diameter range was 10 nm, 13.4 nm and 9.2 nm
Safety Data Sheet
according to 29 CFR 1910.1200(g)

Essentium TPU 80A - Z
Revision date: 11/24/2021
Product code: Page 6 of 11

The tube length distribution of MWCNT was measured by Transmission Electron Microscopy after dispersion in aqueous medium after sonication. The mean tube length was 380 - 902 nm (D90 = 980 - 1820 nm). In all cases length D90 was lower than 5 µm
Specific surface area: 253 m2; Norms: DIN66131

10. Stability and reactivity

Reactivity
No information available.

Chemical stability
Stability: Stable
The product is chemically stable under recommended conditions of storage, use and temperature.

Possibility of hazardous reactions
Hazardous reactions: Will not occur
Refer to chapter 10.5.

Conditions to avoid
Protect against: UV-radiation/sunlight. heat. (>230°C)

Incompatible materials
Materials to avoid: Oxidising agent, strong. Reducing agents, strong.

Hazardous decomposition products
Does not decompose when used for intended uses.

11. Toxicological information

Information on toxicological effects

Route(s) of Entry
Ingestion: May be harmful if swallowed. Inhalation: May be harmful if inhaled. Skin contact: May cause irritation. Eye contact: May cause irritation.

Toxicokinetics, metabolism and distribution
No data available.

Acute toxicity
Based on available data, the classification criteria are not met.

Irritation and corrosivity
Based on available data, the classification criteria are not met.
Sensitizing effects
Based on available data, the classification criteria are not met.

Carcinogenic/mutagenic/toxic effects for reproduction
Based on available data, the classification criteria are not met.
OSHA: No component of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by OSHA.
NTP: No component of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by NTP.

Multi-Walled Carbon Nanotubes (MWCNT), synthetic graphite in tubular shape:
In-vitro mutagenicity:
Method:
- OECD Guideline 471 (Bacterial Reverse Mutation Assay)
- OECD Guideline 473 (In vitro Mammalian Chromosome Aberration Test)
- OECD Guideline 476 (In Vitro Mammalian Cell Gene Mutation Test)
Result: negative.
Literature information: ECHA Dossier

In-vivo mutagenicity
Method: OECD Guideline 474 (Mammalian Erythrocyte Micronucleus Test)
Species: Mouse.
Result: negative.
Literature information: ECHA Dossier

Carcinogenicity:
Species: Rat.
Result / evaluation: Based on available data, the classification criteria are not met. (CLP)
Literature information: Absence of Carcinogenic Response to Multiwall Carbon Nanotubes in a 2-Year Bioassay in the Peri-itoneal Cavity of the Rat, Muller, J. et al., 2009, Toxicological Sciences 110, 442-448

Specific target organ toxicity (STOT) - single exposure
Based on available data, the classification criteria are not met.

Specific target organ toxicity (STOT) - repeated exposure
Based on available data, the classification criteria are not met.
Multi-Walled Carbon Nanotubes (MWCNT), synthetic graphite in tubular shape:
Subchronic inhalation toxicity:
Method: OECD Guideline 413 (Subchronic Inhalation Toxicity: 90-Day)
Species: Rat.
Exposure duration: 90 d
Result: NOAEC = 0.1 - 1.01 mg/m³
Literature information: ECHA Dossier

Carcinogenicity (IARC):
Carbon nanotubes, multi-walled, other than MWCNT-7 (CAS 308068-56-6) is listed in group 3.

Aspiration hazard
Based on available data, the classification criteria are not met.

Specific effects in experiment on an animal
No data available.

Information on other hazards
Endocrine disrupting properties
No data available.

12. Ecological information
Ecotoxicity

The product has not been tested.

Persistence and degradability

Product is not easily biodegradable. Due to its low solubility in water the product is almost completely mechanically separated in biological sewage plants.

Bioaccumulative potential

No indication of bioaccumulation potential.

Mobility in soil

No data available.

Endocrine disrupting properties

No data available.

Other adverse effects

The nanomaterials used may accumulate in organisms and/or in the environment.

Further information

Do not allow to enter into surface water or drains.

13. Disposal considerations

Waste treatment methods

Disposal recommendations

Observe in addition any national regulations! Consult the local waste disposal expert about waste disposal.

Non-contaminated packages may be recycled.

Contaminated packaging

Handle contaminated packages in the same way as the substance itself.

14. Transport information

US DOT 49 CFR 172.101

Proper shipping name: Not a hazardous material with respect to these transport regulations. &
Not controlled under DOT

Marine transport (IMDG)

UN number or ID number: No dangerous good in sense of this transport regulation.

UN proper shipping name: No dangerous good in sense of this transport regulation.

Transport hazard class(es): No dangerous good in sense of this transport regulation.

Packing group: No dangerous good in sense of this transport regulation.

Air transport (ICAO-TI/IATA-DGR)
Safety Data Sheet
according to 29 CFR 1910.1200(g)

Essentium TPU 80A - Z
Revision date: 11/24/2021
Product code: Page 9 of 11

UN number or ID number: No dangerous good in sense of this transport regulation.
UN proper shipping name: No dangerous good in sense of this transport regulation.
Transport hazard class(es): No dangerous good in sense of this transport regulation.
Packing group: No dangerous good in sense of this transport regulation.

Environmental hazards
ENVIRONMENTALLY HAZARDOUS: No

Special precautions for user
refer to chapter 6-8

Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code
not relevant

15. Regulatory information

U.S. Regulations

National Inventory TSCA
All components are listed in the TSCA 8 (b) inventory as "active" or exempted.
No components are listed under TSCA 12(b)
This product contains one or more substance(s) which is/are subject to a TSCA Section 5(e) consent order that imposes certain restrictions on handling, storage, distribution, use and disposal. Contact your supplier for details.

National regulatory information
SARA Section 304 CERCLA:
Methylenebis(phenylisocyanate)(MDI) (101-68-8): Reportable quantity = 5,000 (2270) lbs. (kg)
SARA Section 313 Toxic release inventory:
Methylenebis(phenylisocyanate)(MDI) (101-68-8): De minimis limit = 1.0 %, Reportable threshold = Standard
Clean Air Act Section 112(b):
Methylenebis(phenylisocyanate)(MDI) (101-68-8)

State Regulations
Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65, State of California)
This product can not expose you to chemicals known to the State of California to cause cancer, birth defects or other reproductive harm.

Additional information
This mixture is classified as not hazardous according to Regulation 29 CFR Part 1910.1200.

Physical hazards: On basis of test data and / or calculated and / or estimated.

The above information describes exclusively the safety requirements of the product and is based on our present-day knowledge. The information is intended to give you advice about the safe handling of the product named in this safety data sheet, for storage, processing, transport and disposal. The information cannot be transferred to other products. In the case of mixing the product with other products or in the case of processing, the information on this safety data sheet is not necessarily valid for the new made-up material.

(The data for the hazardous ingredients were taken respectively from the last version of the sub-contractor's safety data sheet.)
