

Essentium DryBox™

The Essentium DryBox™ desiccant dry cabinet, for the storage of filament, intelligently maintains a low relative humidity (RH).

Fully network-capable with mobile connectivity and total accessibility from any networked device, Essentium DryBox™ Intelligent Dry Storage technology enables compatibility with smart factory, Industry 4.0 operations.

Essentium DryBox™ cabinets introduces a new level of recovery performance of less than three minutes to provide constant access to stored parts.

Unique interior “glow lighting” provides a bright white flood of light on command for inspection of contents and intelligently alters color to correspond with **Compliant (Green)**, **Working (Yellow)**, and **Alert (Red)** status that can be monitored at a glance.

Standard Features

FAST RECOVERY TIME

Market-leading recovery time of less than three minutes provides constant access to stored filament. Exceptional, self-regulating drying technology allows assembly specialists to retrieve critical moisture-sensitive filament from dry storage as many as 10 to 12 times per hour. That's more than twice the access of competitive dry cabinets.

Recovery Rate Comparison

EXCEPTIONAL QUALITY

Designed and quality-built in the U.S.A.

NETWORK CAPABLE

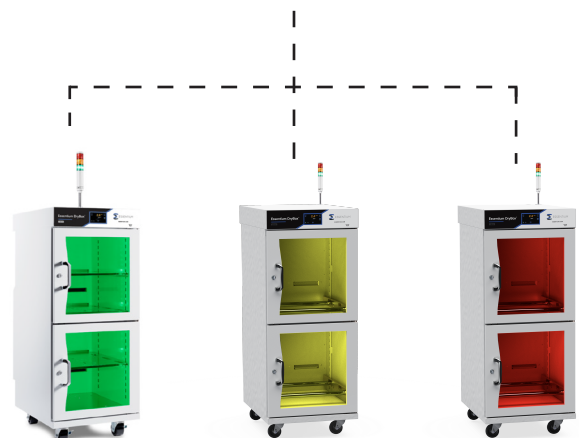

Industry 4.0 Ready - Integrated DryBox™ network capability tracks performance and events from one or many Essentium DryBox™ storage cabinets. Access dry storage data 24/7 from any internet-enabled device.

Standard Feature for all Models

INTELLIGENT LIGHT STATUS

Immediate visual confirmation of dry storage status means no more guessing about cabinet readiness. A simple glance at DryBox™ and its green, amber or red interior lighting tells operators if the unit can be accessed. It's simple, effective and smart. An optional light tower can be integrated for visual status confirmation from across the factory floor.
